PROFESSIONAL SUMMARY

AI Engineer and Python Developer (2026 graduate) skilled in machine learning model training, model deployment, data science, NLP, computer vision, and deep learning. Built production-ready AI applications using Python, Django, TensorFlow, scikit-learn, and REST API development. Applied supervised learning and unsupervised learning at NIT Calicut. IIT Kharagpur certified — top 10% nationally. Seeking an Machine Learning Engineer / ML Engineer / AI Engineer role to deliver data-driven, intelligent, scalable systems through analytical problem solving.

TECHNICAL SKILLS

Languages	Python, SQL, JavaScript, HTML, CSS, C, C++
AI / ML	scikit-learn, TensorFlow, Keras, OpenCV, NLTK, Neural Networks, Transformers
Concepts	Agentic AI, RAG, LangChain, Supervised Learning, Unsupervised Learning, Data Preprocessing, Model Evaluation
Frameworks	Django, REST API Development, Streamlit
Data & Tools	Pandas, NumPy, MySQL, Git, Jupyter, Linux

WORK EXPERIENCE

Machine Learning Research Intern

Sep 2025 – Nov 2025

National Institute of Technology (NIT) Calicut

Kerala, India

- Applied supervised learning algorithms and neural network models in Python for civil engineering data analysis; reduced manual estimation time by **40%** through intelligent automation.
- Built data preprocessing, feature engineering, and regression pipelines; improved model evaluation accuracy by **15%** using cross-validation and performance benchmarking.

PROJECTS

AI Placement Co-Pilot (Vizuara AI Residency) — Production-ready, data-driven artificial intelligence web application using **Python, Django, REST API development**, HTML, CSS, JavaScript. Implemented 5-step pipeline: role-fit scoring, skill-gap detection, and automated ATS resume generation. Integrated LLaMA-3.3-70B large language model for real-time inference; **deployed end-to-end**.

Emotional Assistant Bot (Major Project) — Multimodal deep learning system in Python fusing audio & video streams for real-time emotion detection and classification. Neural network transformer architecture trained via supervised learning achieves **20%+** accuracy gain over single-modality baselines.

Agri Bot — Multilingual Voice Assistant — Python natural language processing (NLP) and speech recognition application (ASR + TTS pipeline) enabling agricultural data queries in native languages. Data analysis on usage patterns; **deployed** and serving ~500 users.

ML Intrusion Detection System — Trained and evaluated a machine learning classification algorithm (Random Forest) on network traffic data; achieved **97%+ detection accuracy** with <2% false-positive rate using model evaluation and cross-validation.

Emotion-Driven Music Player — Computer vision application using OpenCV and neural network-based facial recognition to classify 7 emotion states at **89% accuracy**; real-time data-driven playlist automation.

ACHIEVEMENTS

- Top 10% nationally** — Merit Certificate certification, IIT Kharagpur (AI, deep learning, performance optimization of ML models, data science).
- Competitively selected** for NIT Calicut machine learning research internship from a national applicant pool based on demonstrated Python and ML aptitude.

EDUCATION

Bachelor of Engineering — Artificial Intelligence & Machine Learning, Yenepoya Institute of Technology

Oct 2022 – May 2026

Hands-on AI for Real-world Applications, IIT Kharagpur

Jul – Oct 2024

Merit Certificate — ranked top 10% of all participants nationwide.
